PROFESSIONAL SUMMARY

Master of IT (Computing) graduate from the University of Melbourne with direct experience eliciting requirements, mapping business processes, and bridging technical and non-technical stakeholders. Demonstrated ability to translate operational pain points into actionable system improvements — from automating enterprise workflows to designing user-centred applications. Brings a strong analytical mindset, Agile delivery experience, and a genuine interest in using technology to solve genuine business problems. Seeking a Business Analyst role to leverage these skills in a structured, impact-driven environment.

CORE COMPETENCIES

Requirements Elicitation & Analysis · Process Mapping & Improvement · Stakeholder Engagement · User Story Writing

Agile / Scrum Delivery · Data Analysis & Reporting · UAT & Testing Support · Documentation & Communication

WORK EXPERIENCE

CPT Project Lead / Process Improvement Analyst | Crown Melbourne *Jun 2022 – Present*

- Led a cross hotel business improvement initiative across 3 Crown properties, coordinating stakeholders from Front Office, IT, and Hotel Management delivering a 10% reduction in technical service requests through process redesign.
- Identified manual workflow bottlenecks in guest operations; translated operational pain points into system-level improvements by designing and deploying Excel VBA automation for the Opera PMS eliminating repetitive data entry across a team processing 300+ daily transactions.
- Functioned as a liaison between operational staff and IT, gathering requirements from end users and communicating technical solutions in accessible language to non-technical audiences.
- Managed high-volume operational data (reservations, payments, guest profiles), developing strong diligence and data accuracy practices directly applicable to BA deliverables.

Intern Programmer (BA-Aligned) | Doodle Delivery *Dec 2021 – Mar 2022*

- Elicited and documented business requirements for two production mobile and web applications, designing use cases for key user flows that bridged the gap between product intent and technical implementation.
- Analysed existing systems from a user-experience perspective, identifying and surfacing improvement opportunities, several of which were adopted into the Agile development backlog.
- Worked within a Scrum delivery framework, contributing to sprint planning, backlog refinement, and cross-functional collaboration between product and engineering teams.

Operations Manager | James An College *Jan 2018 – Dec 2020*

- Managed day-to-day operations, finance, and contract administration for 60+ clients weekly — building strong process governance and reporting disciplines.
- Supervised a small team across scheduling, performance management, and issue escalation, developing stakeholder communication and prioritisation skills.

KEY PROJECTS

Sua Hair — Booking & Management Platform | Real Client · In Development *2024–Present*

Full stack platform currently being built for Sua Hair Studio (sua-hair.com.au), replacing a fully manual phone-based booking process. Led end to end discovery, requirements definition, system design, and delivery as sole developer.

- Conducted requirements workshops with the client to map existing processes and define system needs — producing a feature backlog prioritised by business value.

- In Progress: multistep customer booking flow, real time availability engine, admin dashboard with timeline view, client management, and service/pricing management with full price history.

IntelliJourney Educational Analytics Platform | University Project

2023

Full-stack reporting platform integrating the Canvas LMS API with Firebase to surface actionable data insights for students and educators. Defined user requirements, designed data models, and led delivery.

Salary Bias Detection ML Analysis | University Project

2023

Applied supervised ML techniques (Python, scikit-learn) to detect salary bias across demographic groups. Translated analytical findings into clear, stakeholder-ready reporting — achieving 15% improvement in prediction accuracy over baseline through structured feature analysis.

EDUCATION

Master of Information Technology — Major in Computing | University of Melbourne*Graduated Dec 2023*

Bachelor of Agriculture — Major in Agricultural Economics | University of Melbourne*Graduated Dec 2020*

TECHNICAL SKILLS

Tools & Platforms: Jira (Agile), Confluence, Excel (VBA automation), SQL, Firebase, Git, VS Code, REST APIs

Languages: Python, SQL, TypeScript, JavaScript, Java

Frameworks: React, Node.js, Pandas: used to understand and communicate with development teams

Methodologies: Agile/Scrum, requirements elicitation, use case design, process mapping, UAT

VOLUNTEER & EXTRA-CURRICULAR

- Volunteer Guide, Melbourne University Endeavour Exhibition coordinated 15 volunteers for an event attended by 250+ visitors.
- Participant, Herald Sun Run for the Kids (14.6km), and Nike Melbourne Marathon Festival (10km).
